

Port of NEOM and Partners Enable European Multimodal Land Bridge, Advancing Regional Cargo Connectivity

April 14, 2026

Port of NEOM, together with Pan Marine and supported by DFDS alongside regional logistics partners, has enabled a multimodal corridor linking Europe, Egypt, NEOM, and the GCC. The corridor provides a faster and more flexible route for European cargo entering the region, combining trucking and ferry-based freight services to offer a reliable alternative to traditional pathways.

NEOM, Kingdom of Saudi Arabia, 14 April 2026 – NEOM has advanced regional connectivity by enabling a European multimodal land bridge which facilitates truck-carried freight to move directly from Europe to Egypt and into the Gulf, via Port of NEOM.

Pan Marine Group - which launched its RoPax service between Port of Safaga and Port of NEOM at the end of 2025 - activated European connectivity at the end of March 2026, through its partnership with DFDS, a Danish international shipping and logistics company.

This integration allows truck-carried freight to move directly from Europe to Egypt and into the Gulf, via Port of NEOM. The multimodal corridor offers an alternative to previous only container flows and enables the movement of critical goods, including FMCG and other time-sensitive cargo.

The route is already in active use by importers from several European countries including Italy, the UK, Germany, and Poland. The corridor provides direct access into the UAE, Kuwait, Oman, the wider GCC, and Iraq, supporting customers seeking predictable and efficient market entry.

The new pathway builds on a successful intermodal [pilot](#) in 2025 which connected a strategic route from Egypt (*Port of Safaga*), to northern Saudi Arabia (*via Port of NEOM*) onwards to Iraq via the Arar border.

The pilot demonstrated significant reductions in transit time compared with conventional routes, underscoring the value of coordinated maritime and inland routing for time-sensitive shipments.

By linking European networks with Red Sea routes and the land bridge serving Port of NEOM's gateway role, the Port and its partners are strengthening established regional cargo flows and offering a dependable alternative for customers navigating evolving logistics requirements.

Strategically located on the Red Sea and near key inland corridors, Port of NEOM continues to expand its role as a stable regional hub supporting efficient cargo movement between Europe, Africa, Asia, and the Middle East.

Unchartered waters: how legacy ports and smart hubs can evolve together

April 13, 2026

The third feature of a content series produced in partnership with FT Longitude, Investors for Change, explores how advanced technologies are strengthening supply chains.

- *NEOM and FT Longitude have partnered on Investors for Change, a series exploring how ports are becoming future-ready.*
- *Port of NEOM is already open for business in Oxagon, northwest Saudi Arabia.*

NEOM, Kingdom of Saudi Arabia, April 13, 2026

An examination of how legacy ports and next generation smart hubs can evolve together, to strengthen global trade, took place in a content series produced in partnership with the FT Longitude titled Investors for Change.

The [article](#) explains how smart ports are defined by automation, renewable energy, and seamless digital integration, and how Port of NEOM is being built around these principles. Designed from the ground up, the port is evolving into an advanced maritime hub where repurposed dredged materials, renewable energy sources, and next generation equipment underpin future ready operations.

The article features insights from Port of NEOM Operations Director Melissa Blake, highlighting how a clean sheet design enables full automation, renewable energy integration, and AI driven logistics are enabling sustainable port operations.

Visit the [Investors for Change hub](#) to explore how next-generation smart ports like Port of NEOM are redefining efficiency, sustainability, and the future of global trade.

Savvy Games Group and NEOM sign MoU to strengthen Saudi Arabia's games startup pipeline

January 26, 2026

A new Memorandum of Understanding (MoU) has been signed between Savvy Games Group and NEOM to streamline the journey of Saudi gaming startups from incubation to acceleration. This joint initiative aims to strengthen the Kingdom's end-to-end gaming ecosystem and advance the goals of the National Gaming and Esports Strategy under Saudi Vision 2030.

NEOM, Kingdom of Saudi Arabia, January 26, 2026

A new Memorandum of Understanding (MoU) has been signed between Savvy Games Group and NEOM to streamline the journey of Saudi gaming startups from incubation to acceleration. This joint initiative aims to strengthen the Kingdom's end-to-end gaming ecosystem and advance the goals of the National Gaming and Esports Strategy under Saudi Vision 2030.

The agreement formalizes a coordinated approach between Savvy's Nine66 Incubator Program and NEOM's 'Level Up' Accelerator, ensuring that startups graduating from Savvy's Incubator have the training, resources and support required

to progress efficiently into NEOM's Accelerator. This Savvy-NEOM collaboration builds upon the rapid evolution of both programs and shall ultimately support a stronger pipeline of investable gaming studios.

Savvy's Nine66 Incubator Program has helped early-stage studios validate prototypes, build foundational capabilities, and prepare for investor engagement. Through this initiative, Savvy aims to help startups achieve readiness to move into the subsequent stages of development and scaling.

NEOM's Level Up Accelerator provides funding and mentorship to scale incubated studios into self-sustaining businesses. Since 2023, it has grown into a multiphase platform supporting more than 45 Saudi startups, deploying 15 investments, and achieving a 100% survival rate within its portfolio – outperforming many global benchmarks. With 17 international partners offering publishing and support, Level Up has enabled more than 170 jobs and facilitated a historic milestone: the Kingdom's first international publishing deal for a domestic gaming start-up – signed between Fahy Studio and UK-based publisher Kwalee.

Amr Sager, Group Chief of Staff at Savvy Games Group, said: "As the games industry continues to grow at a rapid pace in Saudi Arabia, there is an increasing number of programs and initiatives designed to help emerging studios and entrepreneurs to build, run, and scale their businesses. This momentum is encouraging, and the next step would be to create stronger synergy and alignment across these efforts, so that the journey is smoother and clearer for startups to identify and source the support they need. This is what our partnership with NEOM is really about, and we look forward to working with the team to continue empowering Saudi studios and game makers."

Toby Evan-Jones, Executive Director and Head of Gaming at NEOM, said: "NEOM Gaming is proud to play a role in nurturing the Kingdom's gaming ecosystem, in line with the National Gaming and Esports Strategy. From sparking interest within high schools, to investing into young gaming studios via the Level Up accelerator, it's immensely satisfying to see the green shoots of a viable self-sustaining industry appear. We share a joint view, with Savvy Games Group, that increasing coordination around the startup journey shall benefit all parties, not least the young game makers which we support. We couldn't be more excited about this alignment."

The Kingdom Signs an Agreement with the World Economic Forum to Accelerate Industrial Transformation

January 22, 2026

The Kingdom strengthened its position as a global industrial leader with the signing of a cooperation agreement between the Ministry of Industry and Mineral Resources and the World Economic Forum to enhance the Kingdom's industrial transformation pathways.

- *The agreement builds on frameworks first developed at NEOM's Oxagon, an advanced and clean industrial city in northwest Saudi Arabia..*

NEOM, Kingdom of Saudi Arabia, January 22, 2025

The Kingdom strengthened its position as a global industrial leader with the signing of a cooperation agreement between the Ministry of Industry and Mineral Resources and the World Economic Forum to enhance the Kingdom's industrial transformation pathways.

The agreement focuses on developing a scalable, structured model for industrial transformation in the Kingdom by building capabilities and developing competencies across the industrial ecosystem. This will enhance the Kingdom's position as a leading regional hub for industrial transformation.

The agreement aims to accelerate industrial transformation and promote technology adoption by developing a digital toolkit that supports the journey.

The cooperation framework highlights the Kingdom's efforts and leadership in adopting and developing international best practices in industrial transformation, as well as its role as a key contributor to the Lighthouse Operating System.

Lighthouse OS was developed domestically in the Kingdom by Oxagon, a subsidiary of NEOM, as a pioneering national model for industrial transformation, designed, implemented, and continuously enhanced to align with the highest global standards and best practices.
